The king-size baler with a huge appetite

A load of cardboard boxes up to 1500 mm wide is compacted in seconds! You feed the 3810 safely and conveniently and in return you get valuable storage space and cost reduction due to increased recycling.

Generous loading aperture

The King-Size Baler's wide mouth (one square metre) can swallow large volumes of recyclable materials.

Sliding door and autostart

For even easier and faster loading Orwak 3810 has a sliding door that opens automatically after each cycle. Orwak 3810 is also equipped with an autostart function which allows the baler to start compacting the material as soon as the door closes.

High or low pressure

With a switch on the side of the machine you can alter the setting between High pressure (HP) for cardboard and Low pressure (LP) for soft plastic.
